Float a river

Name _____

Date _____

Float the Kam, the French or the Cuyahoga from its start to the Great Lakes. At each stop, record where you are and the choice you made. The stop card shows the kilometre and the height above sea level.

Open it: inthelakes.ca/learn/experiences/float/ · About 40–60 minutes

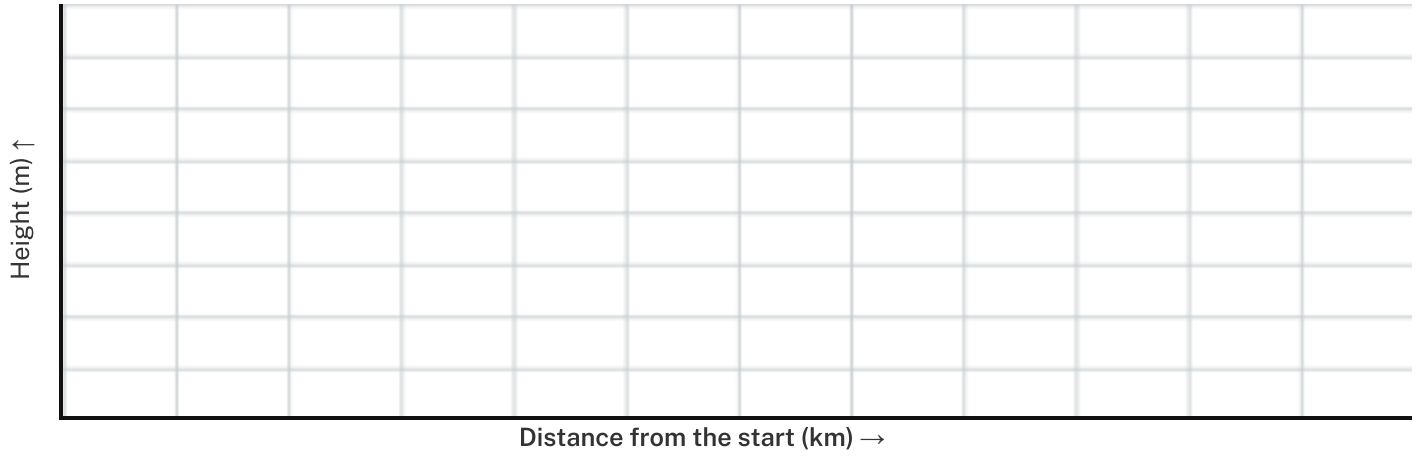

Which river?

◯ The Kam ◯ The French ◯ The Cuyahoga

1 Stop by stop

Stop	km	Height above sea level (m)	The choice I made first	Right first time?

Draw the river's profile: plot each stop's height against its distance, and join the dots.

❷ What you found

Where did the river drop fastest? What did you see there (falls, rapids, a dam)?

Name one safety choice you made, and why it was the right one.

My score from the finale: my first choice was the safe one at _____ of _____ stops.

❸ In your own words

Where does this river's water go after the lake? Trace it all the way to the ocean.
